MAINTANENCE AND CARE

The iMac computer cannot be used for any other task as it interferes with the running of the art, no additional software, hardware peripherals or any other hardware can be connected to the computer.

Please keep in a cool, dry place, and "on" at all times, when in use.

The computer is preprogrammed to turn itself off and on daily in the middle of the night. Do not interfere with this operation.

Turn off and unplug from wall to extend the life of the hardware, If absent

Clean screen with commercial screen cleaners specifically made for computer screens.

It is recommended that a power strip with a surge protector is used to connect the computer and the light to the strip and then the strip to the wall.

In the event of a power outage or other electrical malfunction just press and hold the button located at the back of the computer until you hear a sound. In the event the user wants to turn off the art, also press the button at the back of the computer until it performs its shutdown procedure.

There is no power button for the monitor or lights. The monitor turns itself off with the computer, and to turn off the lights simply pull the plug.

To turn it on again, make sure it is plugged into the wall and press the on button at the back right of the iMac, it might take a few seconds to reboot and restart.

The computer can run on either 110 or 220, the lights in the frame are 110 only, use transformer if necessary.

Never pull the plug on the computer when it is running.

Follow all manufacturer's instructions and specifications.
